Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 April 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase "intended to be" is vague and confusing.

In claim 5, the phrase "intended to be included" is vague and confusing.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zaengerle (4913604) in view of Miller (Re. 21068), David et al. 4946318 and WO 2004062839.

Zaengerle (4913604) lacks the disclosure of serrations arranged on one of its main surfaces and extending parallel to its toothed edge.

Miller discloses a slot milling cutter, which comprises insert seats provided with first serrations and cutting inserts provided with second serrations which are arranged on at least one main surface of the cutting inserts; where the first and second serrations extend in the axial direction of the slot milling cutter.

It would have been obvious to a skilled artisan to provide the insert of Zaengerle with the serrations of Miller to insure a firmer connection between the elements.

With respect to claim 6, Zaengerle lacks the disclosure of serrated surfaces on both sides of the main surfaces. WO 2004062839 discloses such an arrangement comprising serrations (40, 60). It would have been obvious to a skilled artisan at the time of the invention to provide Zaengerle with serrations on both sides in the manner as taught by WO 2004062839 in order to improve the rigidity of the insert when connected to a cutting head.

With respect to claim 8, Zaengerle lacks the disclosure of two opposed toothed edge sides. David et al discloses such an arrangement. It would have been obvious to a skilled artisan to provide Zaengerle with two opposed toothed edges in the manner as

taught by David et al. in order to provide an indexing capability to the tool when the edges are worn.

Allowable Subject Matter

Claim 1 is would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 2-4 and 9-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to WILL FRIDIE JR whose telephone number is (571)272-4476. The examiner can normally be reached on Monday - Thursday.
